brcast

Broadcast.

[called by: dforce.]

contents

1	brcast	1
	1.1 broadcasting	1

1.1 broadcasting

- 1. The construction of the Beltrami fields are constructed on separate cpus.
- 2. All "local" information needs to be broadcast so that the "global" force vector,

$$\mathbf{F}_i \equiv [[p + B^2/2]]_i = (p + B^2/2)_{v,i} - (p + B^2/2)_{v-1,i} \tag{1}$$

can be constructed, and so that restart and output files can be saved to file.
